

Preservation and Digitization Workflow

Kitchen Sink Demonstration Document

1. Prepare source materials and confirm handling requirements.
2. Capture high-resolution scans with calibrated lighting.
3. Record descriptive metadata and preservation notes.
4. Review derivatives for legibility, color, and completeness.
5. Publish approved assets to the knowledge base.

This document is included as a realistic seed asset for local development.

It is not intended to represent a final policy or operational guidance.
